

WATSON INSTITUTE LEAP PRESCHOOL

INCLUSIVE, EVIDENCE-BASED HIGH QUALITY MODEL

The Watson Institute LEAP Preschool (Learning Experiences: an Alternative Program for preschoolers and Parents) offers a unique environment for preschool-aged children diagnosed with Autism Spectrum Disorder to learn alongside their typically-developing peers.

The LEAP model is one of the most validated intervention programs. This innovative model has produced encouraging results, including significant behavioral improvement and developmental gains.

KEY PROGRAM BENEFITS:

Inclusive Curriculum for Children

- Learning activities that help to develop cognitive, motor & communication skills.
- Social and emotional learning model which fosters empathy, celebrates differences & encourages peer interaction.
- Inclusive, small environment that offers support for all children to increase their ability to play and learn with others, learn to make choices, and build pre-academic skills.
- Therapeutic services available, including occupational, physical and speech therapies.

**Conveniently located in
Sharpsburg**

Innovative, Outcome-Driven Program

LEAP reinforces the premise that children with disabilities will learn better in an integrated setting alongside their typically-developing peers.

"The program and staff are wonderful. It's been fun and amazing to watch our son grow and learn. We look forward to next year!"

Parent of a LEAP student
